

Therapeutic Agents

Alimentary tract and metabolism products (enzymes)

Fabrazyme

Allergy

Leukotrienes (inhibitors?)

Astelin

Inhaled glucocorticoids (Flonase)

Optivar

Anesthesia agents

Diprivan

Antibiotics

Merem

Anti-diabetic agents

Insulin glargine

Non-sulfonylurea insulin secretagogues

NPH insulin

Sulfonylureas

Anti-inflammatory agents

COX-2 inhibitors

Antithrombotic agents

Anti-platelet agents

Fondaparinux

Heparin/low-molecular-weight heparin

Warfarin

Benign prostatic hyperplasia treatment

Alpha₁-adrenergic receptor blockers

Cardiac/heart failure treatments

Natrecor (nesiritide)

Milrinone

Dobutamine

Inotropic agents

vasodilators

natriuretic peptides

angiotensin II receptor blockers

HIV/AIDS therapeutic agents

Highly active anti-retroviral therapy (HAART)

Protease inhibitors

Reverse transcriptase inhibitors

Immune system suppressants

Leukotrienes

Accolate

Lipid-altering agents/statins

Migraine therapies

Zomig

Treatments for Parkinson's disease

Dopamine agonists

MAO inhibitors

Oncology agents

IRESSA

Orzel

Oxcarbazepine

Pegylated interferon

Proton pump inhibitors

Psychiatric agents

Quetiapine (Seroquel) in the treatment of schizophrenia

Topics

AIDS/HIV

General therapeutic issues

Highly active anti-retroviral therapy (HAART)

Allergy

Leukotrienes (inhibitors?)

Astelin

Inhaled corticosteroids

Optivar

Atherothrombotic disease and treatment

Anti-platelet therapy

Fondaparinux

Heparin/low-molecular-weight heparin

Warfarin

Breast disease

Surgery of the breast

Breast cancer

Benign breast diseases

Cardiology

Acute decompensated heart failure

Alpha-adrenergic blockers

Beta blockers

Cardiac surgery

Cardiorenal syndrome

Congestive heart failure

Echocardiography

Electrophysiology

- Neonatal and infant cardiology
- Outpatient management of patients with heart failure
- Use of observation units for patients with heart failure
- Coronary artery disease
 - Dyslipidemia
 - High- and low-density lipoprotein
- Diabetes
 - Cardiac complications
 - Hypoglycemia
 - Monitoring hemoglobin A1c
 - Renal failure
 - Treatment, type 1 and type 2
 - Oral hypoglycemic agents
 - Insulin glargine
 - NPH insulin
 - Diabetes-related dyslipidemia
- Dyslipidemia
- Emergency medicine
- Ethical issues in medical/scientific publishing
 - Authorship
 - Duplicate publication
 - Peer review
- Gastrointestinal diseases
 - Gastroesophageal reflux disease
 - Proton pump inhibitor therapy
- Hypertension
- Infectious diseases
 - Hepatitis C
 - Tick-borne diseases
 - Lyme disease
 - Ehrlichiosis
 - Bartonella*
- Interferon therapy for viral diseases and cancer
- Microbiology
- Migraine
 - Zomig
 - Selective Serotonin Reuptake Inhibitors
- Neurology
 - Parkinson's disease
- Oncology
 - Immunomodulatory agents for treatment of hematologic malignancies
 - Lung cancer
 - Breast cancer

Orthopedics

- Hand surgery
- Repetitive stress disorders
- Skeletal trauma

Osteoarthritis

Osteoporosis

- Treatment with hormone therapy
- Treatment with bisphosphonates
- Glucocorticoid-induced osteoporosis

Pharmacotherapy

Psychiatric disorders

- Depression
- Psychiatric treatment-related diabetes mellitus
- Schizophrenia

Radiology

- Pediatric radiology
- CT/MRI

Sports Medicine

- Physical therapy
- Athletic injuries and rehabilitation
- Athletic training

Surgery

- Hand Surgery
- Surgery of the breast

Transplantation

- Ethical issues
- Medical issues
- Spiritual/religious concerns

Urinary tract diseases

- Benign prostatic hyperplasia
 - Treatment with α_1 -adrenergic receptor blockers
 - Treatment for maintenance of sexual function

Veterinary medicine

- Infectious diseases
- Tick-borne diseases
- Treatment and care of gerontologic dogs and cats
